

Executive Summary – AI Personal Assistant Evaluation

As part of the *Practical AI for Executive Personal Assistant* initiative, we evaluated 14+ tools to identify a ready-made solution for Outlook that can automate email categorization, drafting, follow-ups, and meeting scheduling. From this review, **ActorDo** and **Fyxr AI** were shortlisted for hands-on testing.

ActorDo – Summary

ActorDo performed strongly and behaved like a **true, customizable AI assistant**.

Key Strengths

- Custom prompts, rules, filters, and Email AI Training enable precise categorization.
- Accurate analysis of full email context, not just keywords.
- Flexible drafting (tone, style, proactiveness) and dependable follow-ups.
- Rich scheduling features with Microsoft Calendar integration and approval flows.
- Daily briefing summarizing tasks, emails, events, and reminders.
- Unified chat-based workflow reduces effort and saves time.

Limitations

- Requires initial rule tuning and small iterative adjustments.

Conclusion

ActorDo provides reliable automation and strong customization suitable for executive workflows.

FyxrAI – Summary

FyxrAI offers a simpler assistant with limited flexibility.

Strengths

- Easy setup; works directly inside Outlook.

Limitations

- No AI training, no custom categories, and no rule creation.
- Categorization often inaccurate due to keyword-based logic.
- Draft replies cannot be customized.
- Minimal follow-up and meeting settings; performance concerns with notetaker.

Conclusion

FyxrAI behaves more like a keyword extractor and is less suited for enterprise needs.

Overall Recommendation

While both tools were shortlisted after a broad market scan, practical testing shows **ActorDo** is significantly more capable, configurable, and reliable for executive-level email and calendar management.
